Product information

Goalkeeper color: white

Goalkeeper size: SR

TRUE HZRDUS 9X4 FE WHITE SR is a pair of goalie leg pads designed for ambitious ice hockey goalies who are looking for direct, controlled feedback during practice and games. Manufactured by Lefevre, the design features a flat front for maximum coverage and a relatively stiff profile to help direct rebounds more precisely.

- Product Type: Ice hockey goalie leg pads
- Design: Flat front with a stiff structure
- Rebound control: Precise response to rebounds
- Mobility: Single break point below the knee
- Design: Slim shape without an external roll-break
- Closure: Hybrid Pro Laces for a secure fit
- System: Fast Rotation System (FRS) for even weight distribution
- Variant: White, Size SR

On the ice, the difference is most noticeable when quick changes of direction and controlled saves are required. The flexible zone below the knee supports butterfly positioning, while the slim profile stays close to the leg and provides a stable, secure feeling in the net. At the same time, the stiffer construction helps deflect shots away from the pad in a more predictable manner. This model is particularly appealing to experienced senior goalies and performance-oriented goalies who deliberately tailor their equipment for rebound performance and stability.

For Groß-sized leg pads, it's important to carefully match them to your height, knee position, and the rest of your goalie gear.
