Product information

Goalkeeper color: black

Goalkeeper size: SR

TRUE HZRDUS 9X4 FE BLACK SR is a pair of ice hockey goalie leg pads designed for ambitious goalies who prioritize coverage, controlled rebounds, and a clear sense of movement. The design, manufactured by Lefevre, features a flat front and a stiff construction to ensure the pads remain stable during play and allow rebounds to be directed more precisely forward or to the side.

- Product Type: Ice Hockey Goalie Leg Pads
- Design: Flat front design with a rigid structure
- Rebound control: designed for precise rebound control
- Mobility: single break point below the knee
- Design: Sleek shape without an external roll break
- Lacing: Hybrid Pro Laces for a secure fit
- System: Fast Rotation System (FRS) for even weight distribution
- Variant: black, size SR

The difference really becomes apparent during regular training and at higher skill levels: The stiffer construction helps absorb shots with greater control, while the single break point below the knee supports movements in the butterfly position and when standing up. The slim profile keeps the pad snug against the leg without sacrificing the desired stability. Combined with the FRS and the Hybrid Pro Laces, this creates a setup designed for a stable, responsive feel in goal.

For adult sizes, it's worth carefully comparing the pad to your own goalie equipment and preferred playing style.
