Product information

Color: black
Stock type: Links
Bends: T31
Stick size: SR

TRUE CATALYST NITRO SR is a goalie stick designed for goalies who have little time during the game and need a direct, controlled feel in the crease. The design is engineered for stability, quick reactions, and clean puck handling, ensuring that saves, rebounds, and puck distribution remain under control during the intense demands of everyday hockey.

- Product Type: Performance goalie stick for ice hockey
- IntendedUse: Training and high-intensity games
- Feel: Responsive and controlled
- Construction: Sturdy for repeated use in the crease
- Puck handling: facilitates precise passes and controlled giveaways
- Model: T31, Left-handed, SR
- Color: black

For performance-oriented senior-level goalies in particular, it's not just the save itself that counts, but also what happens immediately afterward. A stick in this category helps you catch the puck smoothly, pass it with control, and open up the play without unnecessary panic. At the same time, the handling remains modern and direct, which is noticeable during quick movements in the slot and when reaction times are short.

Key factors for selection include the senior size (SR), the left-handed version, and the T31 bend, ensuring the stick matches your usual catching and stick hand.
