Product information

Shoe color: black

Shoe width: R (Regular)

TRUE CATALYST 9X4 REGULAR SR is a goalie skate designed for goalies who move quickly from side to side during the game and need direct, controlled movement in the crease. This model is clearly designed for ambitious to performance-oriented goalies who are looking for a game-ready solution closely tailored to modern goalie movements.

- Technology: one-piece, patented NEUROFIT+ shell
- System: MotionCuff technology for greater mobility in the ankle area
- Feel: Designed for responsiveness, mobility, and speed between the posts
- Fit: Regular, Width R
- IntendedUse: Ice hockey goalie skates for performance-oriented play
- Color: black
- Sizes: EU 42 to 47
- Model: SR

The combination of the one-piece shell and the MotionCuff construction supports a clean ankle articulation and increases the range of motion in areas where goalies work particularly hard during pushes, recoveries, and lateral shifts. This ensures movement remains not only free but also controlled—a difference you'll notice during training and games when making quick changes of direction. If you already appreciate the signature TRUE fit and are looking for a direct, precise feel underfoot on the ice, you'll find a model here that's clearly designed for goaltending.

When selecting a pair, be sure to choose the SR version, Regular width (R), and the appropriate skate size.
