Product information

Color: black

Stick size: INT

The TRUE CATALYST NITRO INT is a hockey stick designed for ambitious youth and club players who prioritize quick decision-making and a direct feel for the game. The Catalyst line is designed for control and responsiveness; the Nitro complements this with a balanced setup for quick shots, clean passes, and precise puck handling.

- Product Type: INT Hockey Stick
- Feel: direct and responsive
- Shooting performance: designed for quick shots, especially wrist shots
- Grip: grippy shaft for a secure grip
- Blade: responsive with precise puck feel
- Curvature: T28 or T92
- Hardness: 45, 55, or 65
- Version: left- or right-handed, color: black

On the ice, this balance really shines when time is running short in the offensive zone. The stick responds cleanly in tight spaces, supports quick shots on the move, and keeps the puck under control on the blade during short passes or changes of direction. This combination of grip, feel, and direct feedback is especially important for players in the INT category who are refining their timing and technique and train regularly.

When selecting a stick, pay attention to the appropriate hardness, blade orientation, and your preferred curvature (T28 or T92).
