Product information

Goalkeeper color: black

Goalkeeper size: SR

TRUE CATALYST 7X6 SR is a goalie stick designed for ambitious goalies who want to be just as precise when building plays as they are when handling rebounds right in front of the net. This model is designed for senior-level goalies who are looking for responsive handling, solid balance, and a controlled feel when facing shots and making puck contact.

- Product Type: Ice hockey goalie stick
- Shaft profile: Mid-kick-oriented Catalyst construction
- Feel: Excellent balance for quick stick movements
- Control: cushioned, controlled feel during shots and rebounds
- Construction: Reinforced paddle and blade areas for greater stability
- Applications: Blocking, passing, and puck handling in goalkeeping
- Variant: SR, black, Regular or Fullright

On the ice, this balance is especially noticeable when time is short. The stick feels stable in your hand but responds instantly when you need to actively play the puck or direct a rebound into a safe zone. Compared to simpler models, the 7X6 feels more stable and responsive upon contact, which is particularly noticeable during regular training and intense club games. For goalies who want to do more than just cover the net—but also actively shape the game with their stick—this model offers an overall feel geared toward athletic performance.

Be sure to choose the correct catching hand: available in Regular or Fullright.
