Product information

Shoe color: black

Shoe width: R (Regular)

TRUE CATALYST 5X6 INT is a hockey skate designed for regular ice time, where comfort, support, and a responsive feel must all come together. Especially for everyday club play or for ambitious recreational players, it's important to have a skate that fits the foot snugly, provides stability during movement, and reliably supports quick maneuvers on the ice.

- Product Type: Hockey Skate
- Fit: anatomically shaped with TRUE's signature snug, comfortable fit
- Feel: Direct skating feel with solid power transfer
- Stability: Designed for regular practices and games
- Intended use: quick bursts of speed, changes of direction, and controlled turns
- Shoe width: R Regular
- Color: black
- Sizes: EU 37.5 to 39 / Skate Size 4 to 5.5

The balanced construction helps execute movements cleanly on the ice without making the skate feel unnecessarily stiff. This makes this intermediate model particularly appealing to players who train or play several times a week and are looking for a noticeable connection between their foot, the blade, and their movement. When accelerating, in tight turns, and during quick changes of direction, the skate remains controlled and close to the foot, which instills confidence—especially at higher speeds.

The regular width is suitable for feet of normal width. When choosing a skate, it's worth taking a close look at the length and fit, as the fit in hockey directly affects stability and the feel of the skate.
