In everyday hockey, clothing is most comfortable when it doesn't restrict movement and blends seamlessly with the rest of your gear. Arm warmers of this type fit snugly, are lightweight, and can therefore be easily integrated into regular training routines. This is particularly beneficial for players who don't want to go through the hassle of changing gear between warm-ups, intense drills, and short breaks.

It's also helpful for teams and club players that multiple sizes are available. This makes it easier to ensure a consistent fit across the team.

When choosing, the most important factor is a size that fits snugly without unnecessarily restricting freedom of movement in the elbow area.
