The Unilite blade is one of the most popular shapes in floorball for precise handling and a smooth feel on the ball. Combined with the 26 flex, it offers a balanced blend of control and shooting performance that's well-suited for regular indoor practice sessions and everyday club play. The PE version of the blade is designed for indoor floorball and feels familiar during technical moves such as dribbling, pulling, and direct passing. The black/gold finish keeps the look clean and classic.

When selecting a stick, be sure to choose the correct blade orientation and a stick length that suits your height and playing style.
