Product information

Goalkeeper size: SR

TRUE CATALYST NITRO SR is a stick for senior-level goalies, designed for regular practice and games. A smooth, direct feel when the stick makes contact is especially important on the catching and stick sides. This model, available in white or white/black, is designed for goalies looking for a clean, modern look in their goalie setup.

- Product Type: Glove for ice hockey goalies
- Model: Catalyst Nitro
- AgeGroup: SR
- Style: Fullright or Regular
- Color: white or white/black
- Intended Use: Training and games in the goalie area

When it comes to stick-handling, what matters most in everyday play is a seamless combination of stick control, freedom of movement, and a harmonious overall feel with the rest of the goalie's equipment. The TRUE GB Catalyst Nitro SR fits perfectly into this category: a senior model for goalies who need a reliable stick side on the ice and who deliberately tailor their equipment to game play. The choice between Regular and Fullright is crucial here, as the hand assignment must match your usual stick-handling style.

To make the right choice, pay attention to the appropriate stick-side configuration as well as your preferred color combination.
